Officers Capture Another Moonshine Plant

A moonshine plant—a genuine copper outfit—was seized last Saturday by Sheriff Young and Deputy Newton Green in the Pottertown section of North Fork township, this county. The plant was discovered, and upon arrival the officers were disappointed to find it deserted, the still just having been removed from the furnace. However, there remained some four or five hundred gallons of beer, which was promptly destroyed, and search instituted for the missing still. The cap and worm were found in some near-by underbrush, and, after several hours search the still was found snugly hidden away in a hollow tree something like one-fourth of a mile from the plant. It is of 30 gallon capacity, solid copper, and is now in the county jail awaiting its fate, by order of the county commissioners. The catch is one of the best made in the county for sometime and the officers are to be congratulated upon at last bagging it after many fruitless efforts.
